HEAT gas technologies GmbH – a company of RMA group

Dear Business Partners,

in August we already informed you about the upcoming takeover of the majority shares in HEAT Wärmetechnische Anlagen GmbH by RMA Group. The takeover has now been completed on October 10, 2020 and the company CEH4 Technologies, a subsidiary of RMA Group, will take over the majority shares in HEAT Wärmetechnische Anlagen GmbH.

The company's focus on international plant construction and the production of components and skid solutions will continue unchanged. The entire team and your previous contact persons are still available to you. Mr. Peter Neuhauser will lead the company as managing director and will also be involved in the company as a partner.

In the course of the changes in the ownership structure, the company name will be changed to

HEAT gas technologies GmbH.

The commercial register registration and UID number remain unchanged.

RMA is an international system provider for valves, pipeline components, as well as for measurement and control technology and thus offers **HEAT gas technologies** new opportunities for cooperation in production and sales and in international project business.

The cooperation in engineering and in the development of hydrogen components and applications also has great future potential.

We would like to thank you for your trust and long-term cooperation and look forward to a continued successful partnership.

The well-known contact persons from purchasing and sales will be happy to answer any queries and further information.

Sincerely yours

Peter Neuhauser
Managing Director

HEAT gas technologies GmbH
